

# Seeing the Atmosphere

## Table of Contents

<b>1. Ways of Seeing</b>	
1.1 Introduction	1-1
1.2 Graphs	1-5
1.3 Isopleths	1-8
1.4 Plotted Data	1-10
1.5 Images	1-12
1.6 Visualizations	1-14
1.7 Equations	1-14
1.8 Conceptual Models	1-16
Questions	1-17
<b>2. Point Observations</b>	
2.1 Introduction	2-1
2.2 Accuracy and Representativeness	2-1
2.3 METAR Observations	2-4
2.4 Graphs in Time	2-9
2.5 Synoptic Observations	2-12
2.6 Ship and Aircraft Observations	2-17
2.7 Graphs in Space	2-19
Questions	2-21
<b>3. Space, Time, and Motion</b>	
3.1 Wind Observations	3-1
3.2 Plotting Winds and Other Data	3-4
3.3 Derivatives in Time and Space	3-13
3.4 Advection	3-15
3.5 The One-Dimensional Advection Equation	3-17
3.6 Equations on the Brain	3-21
3.7 Space-Time Conversion	3-24
3.8 Phase Speed	3-27
Questions	3-29
<b>4. Creating a Hand Analysis</b>	
4.1 Introduction	4-1
4.2 Observations	4-1
4.3 Types of Analysis Errors	4-2
4.4 Determination	4-3
4.5 State of the Atmosphere	4-5
4.6 Contour Spacing and Gradients	4-11
4.7 Creating Your Depiction	4-16
4.8 Common Errors	4-18

4.9 Conclusion	4-21
Questions	4-21
<b>5. Soundings</b>	
5.1 Sounding Observations	5-1
5.2 Upper Air Maps	5-2
5.3 Sounding Diagrams	5-4
Sidebar	5-5
5.4 Thermodynamic Quantities from Soundings	5-5
5.5 Vertical Derivatives and the Hydrostatic Equation	5-7
5.6 Lapse Rates	5-10
5.7 The Buoyancy Equation	5-11
5.8 The Thermodynamic Equation	5-14
5.9 Latent Heat Release	5-16
Questions	5-17
<b>6. Remote Sensing</b>	
6.1 Satellite Thermal Sounders	6-1
6.2 Images and Gradients	6-6
6.3 Water Vapor Images	6-8
6.4 Infrared Images	6-9
6.5 Visible Images	6-11
6.6 Wind Profilers and Radars	6-12
6.7 Time-Height Sections of Wind	6-17
6.8 Other Time-Height Sections	6-20
6.9 Vertical Sections	6-22
Questions	6-23
<b>7. Bits of Vector Calculus</b>	
7.1 Vector Magnitude and Direction	7-1
7.2 Vector Addition and Unit Vectors	7-6
7.3 Vector Multiplication and Components	7-8
7.4 Vector Subtraction	7-10
7.5 The Dot Product	7-12
7.6 Advection as a Dot Product	7-13
7.7 The Cross Product	7-17
7.8 Divergence and Curl	7-19
Questions	7-20
<b>8. Coordinate Systems</b>	
8.1 Conventional Coordinate Systems	8-1
8.2 Earthbound Coordinates	8-5
8.3 The Hydrostatic Equation Revisited	8-8
8.4 The Hypsometric Equation	8-9
8.5 Thickness	8-12

8.6 Critical Thickness	8-14
Questions	8-15
<b>9. Vertical Motion</b>	
9.1 Divergence in Two and Three Dimensions	9-1
9.2 The Divergence Theorem	9-3
9.3 Estimating Divergence on a Weather Map	9-6
9.4 Three-Dimensional Divergence and the Atmosphere	9-8
9.5 Vertical Motion and Convergence	9-12
9.6 Computing Vertical Motion from Divergence	9-16
9.7 Vertical Motion at the Ground	9-17
9.8 Advection and the Total Derivative	9-18
9.9 The Thermodynamic Equation, Revisited	9-19
Questions	9-22
<b>10. Geostrophic Balance</b>	
10.1 Wind and Height Gradients	10-1
10.2 The Geostrophic Equation	10-2
10.3 Geostrophic Divergence	10-8
10.4 Geostrophic Advection	10-11
10.5 Streamfunctions	10-13
10.6 The Nature of Geostrophic Balance	10-14
10.7 How to Attain Coriolis Nirvana	10-17
10.8 The Nature of the Coriolis Force	10-21
10.9 Acceleration	10-22
10.10 Gradient and Cyclostrophic Winds	10-24
Questions	10-28
<b>11. Imbalance and Vertical Motion</b>	
11.1 Wind-Parallel Accelerations	11-1
11.2 Wind Motion and System Motion	11-6
11.3 Convergence and Ageostrophic Wind	11-8
11.4 Isallobaric Wind	11-11
11.5 Convergence and the Chain Reaction of Forces	11-16
11.6 The Atmosphere Resists Motion	11-18
Questions	11-19
<b>12. Atmospheric Structure</b>	
12.1 Structure of the Troposphere and Stratosphere	12-1
12.2 The Real Tropospheric Lapse Rate	12-4
12.3 Response to Vertical Motion	12-5
12.4 Convergence at the Tropopause	12-7
12.5 Vertical Wind Shear	12-8
12.6 Computing Wind Shear from Wind Vectors	12-11
12.7 The Mathematics of Thermal Wind	12-13

12.8 Interpreting Thermal Wind	12-16
12.9 Warm and Cold Cores	12-18
12.10 Temperature Advection from Sounding and Profiler Data	12-20
12.11 Recap	12-22
Questions	12-22
<b>13. Fronts and Frontogenesis</b>	
13.1 Fronts as Temperature Gradients	13-1
13.2 Surface Fronts	13-3
13.3 Upper-Level Fronts and Split Fronts	13-6
13.4 Fronts and Wind Shear	13-7
13.5 Gravity Currents	13-10
13.6 Deformation	13-12
13.7 Deformation and Frontogenesis	13-15
13.8 Frontogenesis and Vertical Motion	13-17
13.9 Fronts and Jet Streaks	13-20
Questions	13-22
<b>14. Vorticity</b>	
14.1 Curl	14-1
14.2 Vorticity	14-4
14.3 Vorticity and Convergence	14-7
14.4 Predicting Vertical Motion	14-9
14.5 Potential Vorticity	14-10
14.6 Potential Vorticity and Vertical Motion	14-12
Questions	14-16
